

Welcome to your journey towards relaxation and wellness with LifeSmart! This pre-delivery guide aims to ensure your sauna arrives safely and smoothly, allowing you to enjoy its benefits to the fullest. Whether you're new to sauna therapy or a seasoned enthusiast, we're here to assist you every step of the way.

Here is a guide for preparing for the delivery and assembly of your LifeSmart sauna.

## PREPARE YOUR SUPPLIES

Ensure you have the following ready:

- Furniture Dolly
- Step Ladder
- Power Screwdriver
- Clear Pathway
- Team of Helpers

## GET THE RIGHT EQUIPMENT

Use a furniture dolly if necessary to move the crate.

Have a step ladder and power screwdriver on hand for assembly tasks.

## PROTECT AND SECURE PANELS AND DOOR

Exercise caution, especially with the glass sauna door, during handling and assembly of panels.

## PREP FOR DELIVERY

Your sauna will arrive in a large wooden crate weighing up to 500 lbs.

The carrier will deliver your sauna curbside, at the edge of your driveway.

Inspect the crate for any signs of loose or damaged packaging.

## UNLOAD AND STAGE

Carefully unload the crate contents to a secure staging area designated for assembly.

## SITE SELECTION PREPARATION

Choose an indoor location for your sauna near an accessible electrical outlet.

Ensure the floor where the sauna will be placed is level.

## GATHER YOUR HELPERS

Assembly requires two or more people capable of safely unloading, lifting, and maneuvering the sauna parts, including the doors.

## PREPARE YOUR PATHWAY

Clear the pathway from the delivery point to the installation area (Point A to B). Remove obstacles and debris that may hinder movement.

## ASSEMBLY

Refer to the Owner's Manual provided for detailed assembly instructions.

**By following these steps, you'll be well-prepared to receive and assemble your LifeSmart sauna, ensuring a smooth and safe installation process.**
